

Enlyte Introduces NJ Decision Point Review

For the first time EVER, Enlyte can offer what most solutions can't.

The New Jersey Decision Point Review (NJ DPR+) delivers an end-to-end solution without outsourcing any component of your workflow to an external vendor; and leverages integrated platforms within the Enlyte suite of products to ensure effective and compliant outcomes. DecisionPoint integrates with your claims system, offering leading provider and specialty networks, electronic billing and payment technologies, and clinical services—all to simplify the claims management process and provide you with the precise information you need to make the right decisions at the right time.

Our solution is more than just a DPR Plan.

It is a plan that includes a full end to end service, plus seamlessly integrates bill review with managed care improving outcomes and savings on New Jersey claims. The Genex clinical operation will perform the utilization review, telephonic case management review, and IME review for any NJ claim.

Integrated solutions and intelligent workflows expertly customized to your business.
