

Apricus **Specialty Solutions**

Specialty Digital Workspace

Your digital workspace for complete specialty coordination. Our patient-centric platform supports physical medicine and other specialty services.

Accessible directly through Enlyte360, the Apricus portal is a fully integrated workspace designed to simplify how you manage specialty services through a centralized hub where referrals, case activity, documentation, and communication all live together in one place.

Unlike other portals that focus on a single service lines, Apricus brings together all specialty activity across a claim. Physical medicine, diagnostics, transportation, durable medical equipment (DME), or other specialty services can be accessed, managed, and acted on from a single dashboard.

Benefits

- › **Configurable to workflow requirements**
- › **Scheduling status updated every 48 hours**
- › **Evaluation notes available within 2 days**
- › **Utilization Review (UR) determination visibility**
- › **Order alerts direct to the dashboard**
- › **Access to specialty history**
- › **Physical medicine attendance updates and progress reports**

Transparency and Control Without the Burden

Submitting a referral is straightforward and efficient, allowing claim handlers to include all relevant services and documentation at once. Follow a case from start to finish to monitor scheduling progress, review notes, and access updates to reduce the need for manual follow-up.

Efficiency and Time Savings

- › Submit referrals for multiple services in a single workflow
- › Quick action tools (approve, deny, transfer, message support)
- › Advanced search by claim number or key identifiers
- › Customizable filters to prioritize and organize workload
- › Coverage features to easily reassign cases during absences
- › Direct communication with Apricus support.

Integrated Experiences

Embedded within Enlyte360 for single sign-on access

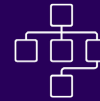

Centralized dashboard with a complete view of all specialty orders

One platform for physical medicine, DME, diagnostics, transportation, and more

Real-time status tracking (authorization, active, completed)

Full claim-level visibility across all specialty services

Integrated claim activity view with full-service history

A Smarter, More Connected Way to Manage Specialty Care

The Apricus portal is designed to do the work, so your claims handlers don't have to.

Behind every referral is our Apricus coordination team to manage scheduling, provider communication, and ongoing case activity. Your dashboard is your window into that process, providing transparency and control without adding the administrative burden.

The result is a faster, more streamlined approach to specialty care management that reduces delays, improves communication, and allows claims handlers to focus their time on getting injured employees back to work.
