

Auto Casualty

Go Paperless: Digitizing the Claims Payment Process

Event Details

Start: July 7, 2020 @ 8:00PM EDT End: @ Location: Online Event

Claims organizations continue to build and enhance their global digitization strategies, especially in the midst of the COVID-19 pandemic. Across the auto casualty and workers' compensation insurance ecosystem there are many opportunities and areas to apply technology, from using mobile apps to push safety warnings to drivers to automating the settlement process. When it comes to claims processing operations specifically, one immediate opportunity for payors is digitizing the medical billing and payments process. Join Mitchell's upcoming webinar to learn more from Adam Gerger, senior strategy and planning manager, about the digital economy, the benefits of achieving a paperless claims process, rules and regulations for electronic payments and billing, and more!
What You'll Learn:

- Information About the State of the Digital Economy
- Benefits of Going Paperless
- How to Maintain Compliance with State Regulations
- Questions to Ask When Evaluating Electronic Payment Vendors
- Information about Mitchell's paperless solution

Register Now To learn more about electronic payments, how billing solutions can help digitize the claims process and how to select an electronic payments vendor, read the following articles.
