

Auto Casualty

PLRB Webinar: Auto Casualty Claims Management Technologies

Event Details

Start: July 15, 2020 @ 8:00PM EDT End: @ Location: Online Event

Technology is evolving at an ever-increasing pace. New technology is being used to solve everyday problems in our personal lives, and the same can be true in our professional lives as we look to improve the handling of auto casualty claims. Mitchell Vice President Norman Tyrrell and Liberty Mutual Strategy & Product Manager Ben Fisher will present a webinar for PLRB members that looks at how sophisticated and evolving technologies like AI, robotic process automation, voice recognition, chatbots, blockchain and more can be applied to auto casualty claims management to help provide better efficiency, service and outcomes for the insurance carrier and the injured party.

What You'll Learn

- Identify Recent Technology Innovations
- Explain How Technology Innovations Can Be Applied to Claims Workflows
- Describe How Technology Can Improve Efficiency, Service and Outcomes for the Carrier and the Injured Party

Please note, this webinar is only available to employees of PLRB insurance member companies and affiliate member companies. PLRB members can visit plrb.org to register.Visit PLRB.org
