Ron Skrocki

Senior Vice President, Product Management & Development

In "Using Data to Affect Change in Workers’ Comp," Ron Skrocki, Senior Vice President at Genex Services, emphasizes the transformative power of data analytics in the workers' compensation industry. He advocates for an evolutionary approach to change, leveraging continuous data analysis to identify high-risk claims, optimize provider networks, and enhance treatment protocols. Skrocki underscores the importance of collaboration among stakeholders and the integration of subject matter expertise to translate data insights into actionable strategies, ultimately leading to improved outcomes and cost efficiencies in workers' compensation programs.?
